N.H. RESEARCH

Size: 30,000 Square Feet

Location: Irvine, California

Challenge *Leaking BUR Capsheet Roof*

- Constant leaks.
- Major deck deflections and water ponding.
- Sensitive ongoing internal operations.

Solution *AcryShield® SPF Roofing System*

- Deflection fill-ins to eliminate major ponding.
- Extra insulation and energy efficiency.
- No disruptive and costly tear-off.

An AcryShield SPF Roofing System was the ideal re-roofing choice that restored slope-to-drain and improved energy efficiency while saving NH Research the risk and cost of an extensive tear-off project.
